New ticketing system

- **Validation Südtirol Alto Adige Guest Pass:** Public transport buses are currently being gradually equipped with new technology for ticketing and passenger information. The new validators can be used to a limited extent during this introductory period.

Contactless tickets can be **validated as usual**

Tickets with **magnetic strips** are valid as visual ID

Storage/keeping Guest Pass

Be careful when handling and storing the tickets. The magnetic strips are unfortunately very sensitive, so please protect them from bending and demagnetisation! Possible sources of demagnetisation include: Mobile phones, magnetic closures, POS devices, copying machine etc. Please store the ticket away from the devices listed.

If the ticket is damaged with a magnetic stripe, it will be stamped by the validation machine on the bus/train with "**illeg./Unleserl.**" + **date and time**. The passenger can still continue the journey for the entire day, but must then exchange the card at their place of accommodation.
